

Streets routed to avoid crossing students

Listed are streets/roads the District does not recommend crossing students for one or more of the following reasons: speed limit, lack of clear sighting and/or high traffic. This does affect bus routes and the length in which some students may ride. The District along with the Transportation Department considers all factors when routing to limit the length of time students are on buses. The District and Transportation strive to design for door side pickup; however, a multitude of unavoidable variables do not always allow for it. The streets below are routed with door side pick-ups and drop-offs.
