08:00am - 11:00am	<b>Make Learning Epic</b>	Purpose is a powerful motivator, for educators and their students. Using humor, inspirational stories, and researched-based strategies, Trevor shares how to use the power of story, brain science, and authentic learning to help teachers achieve true student engagement. Educators leave with proven practices to design authentic learning experiences, motivation to foster deeper student connections, and a compelling reminder of the impact they have on their students' lives. 12:30pm - 3:30pm	<b>Making Connections With Challenging Students</b>	Student success often has less to do with student intelligence and more to do with their connection to the learning environment. Students who do not connect with either the teacher, their peers, or the fundamental purpose of school usually struggle there. Teachers, as guides and mentors, play a pivotal role in fostering these connections and relationships, shaping a supportive environment where students can not only grow academically but also flourish personally in school and life. Using stories, humor, and sharing proven practices, Trevor helps educators explore ways to form these connections, ensuring every student has the opportunity to thrive in the classroom. 08:00am - 3:30pm	<b>Interest Based Training 2-Day Training</b>	A brief orientation to the process as offered by The Federal Mediation & Conciliation Service. At its most fundamental level Interest Based Bargaining (IBB) can be defined as an alternative style of negotiating that trained negotiators use to achieve positive results for both parties. It is a style that uses beliefs, principles, steps, and techniques that are distinctly different from traditional adversarial bargaining. The emphasis in traditional bargaining is on the relative power of the parties and their willingness to use it both in regard to specific issues as well as the overall settlement. IBB is instead a problem solving/consensus approach to negotiations that focuses on the interests of the parties. IBB is not the next step in the evolution of collective bargaining. <b>Afternoon Sessions</b>									
12:30pm - 3:30pm	<b>Behavior vs Sensory Processing (ESE20)</b>	Behavior and sensory processing are crucial aspects of a child's development that can impact their performance in the classroom. Sensory processing refers to how children respond to sensory information from their environment, while behavior refers to their reactions in different situations. Children with sensory processing difficulties may have behavioral challenges like impulsivity, distractibility, and difficulty with transitions. Similarly, children with challenging behaviors may have underlying sensory processing difficulties. Teachers can support children struggling in these areas by creating a learning environment that addresses both behavior and sensory processing. Strategies like sensory breaks and behavior plans can be helpful. 12:30pm - 3:30pm	<b>CPI Verbal De-escalation (ESE20)</b>	This training will provide participants the skills needed to build an effective culture of safety and respect within schools. It is designed to help build the knowledge and skills needed to recognize and manage these behaviors. As behaviors are managed, participants will begin to establish a common philosophy and culture of CARE, WELFARE, AND SAFETY FOR ALL. Be mindful of your gestures, facial expressions, movements, and tone of voice. Keeping your tone and body language neutral will go a long way toward defusing a situation. AVOID OVERREACTING.
